INHA UNIVERSITY
Inha University Overview

INHA University has fulfilled its primary duty as a cradle of advanced knowledge and major scientific discoveries while trying to enhance pragmatic education and practical research, and to consolidate cooperative ties with industries and communities. Following the footsteps of 120,000 alumni contributing as leading professionals around the globe, 20,000 students are currently involved in study and research at Inha University for prosperous future of Korea and the world under the banner of “Learn at Inha and Reach Out to the World!”.

As one of the top 10 universities in Korea, Inha University has re-invented itself to lead the initiative of “INnovation” and “HArmony” in the global arena of higher education. With the “Global Inha Vision 2020”, Inha University sets its goal to be among the Global Top 100 Universities by 2020. Inha University’s top priority for the future is to successfully complete the grand project of building a global campus in Songdo International City by 2018.

The campus is intended to serve as a spearheading frontier for advanced technologies and industry transfer in Korea.

Presently, Inha University has established partnerships with 129 universities and research institutes worldwide. More than 1,000 international students and scholars join the campus as a part of dynamic and diverse Inha community for various purposes, such as, studying for degrees, cultural exchange, acquiring language training, teaching classes, or participating in joint research.

Brain Korea 21st Century Project

- ‘Brain Korea 21(BK21)’ is a large-scale project initiated by the Ministry of Education, Science and Technology of South Korea to help upgrade a few selected Korean universities to the world-class status in science and engineering. BK21 is an ambitious policy that will establish creative and international high-quality human resources and will foster professional graduate schools and globally leading universities.
- In 2009, all 14 research teams from Inha University are reselected for BK21 project with the research fund of more than KRW 7.1 billion.
